PURE ROYAL SOLUTIONS

Purpose and Justification

The learn a language app has been designed for people with a good understanding of English and who wish to communicate with South Africa abundant cultures in their own languages. For example, many foreign students have an understanding of English yet they cannot speak our other local languages.

Project Requestor: The learn a language app's target audience is anyone who speaks Basic English and would like to communicate with people from other cultures within South Africa.

Statement of the Problem or Need:

South Africa has 11 official languages and the beauty of it is that people are proud of their languages but this create conflicts because we rich a point where we misunderstood each other. At the other side foreigners find it hard to learn each language because they don't know which province got highest population of people speaking a particular language. Learn a language will help everyone to know which province has high population of people speaking particular language and will also provide basic phrases with audio of pronunciation.

Strategic Context:

- The user should either own or have access to a Smartphone/Tablet.
- The User should have a basic understanding of English.

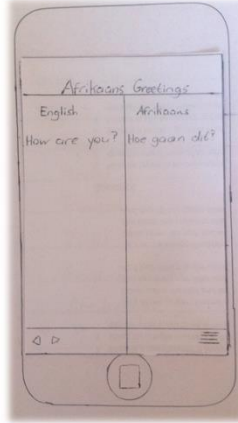

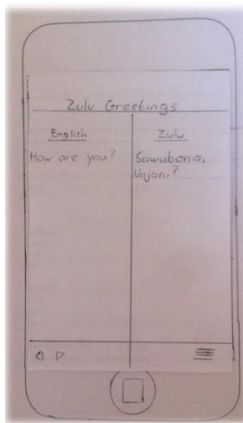

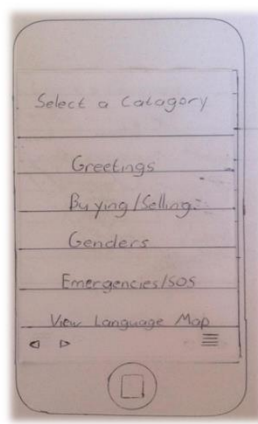

Time Factors:

No training will be offered.

Prototypes

Prototypes

Low Fidelity

Special Provisions:

Internet Required

Related Projects:

There is no application which is similar to this one yet. For one to learn a language that person will have to register a course online.

Assumptions:

- No external software's needed to be downloaded
- The existing network data transfer rate will be sufficient.
- No configuration is needed

Constraints:

It is important that the website server is always running.

Project Risks:

There is a risk that the server may stop functioning prior to installation of the files which will be hosting the website.

Project Expenses:

- Website Domain: e.g co.za, reason for using this domain is because one can actually tell that it's a south African website.
- Hosting the website
